Course Description

Auditing is critical to compliance. It also ensures that you maximise the benefits that implementing ISO 9000 can bring. Effective auditing is a highly specialised skill, and one that must be learnt. This practical three-day course provides a firm grounding in ISO 9000 and the theory of auditing techniques. A series of workshops leads delegates step-by-step through each stage, taking auditing from theory to practice.

Delegates will acquire a comprehensive understanding of:

- The requirements of ISO 9000
- Auditing techniques compatible with ISO 9000 and ISO 10011
- How to plan, perform and report on an audit
- How to take corrective action.

Who should attend?

- Those nominated to perform the auditing function
- Managers assessing the suitability of procedures, processes and systems already in place.
